

Smooth Bore / Plain PTFE Hose

Abcoflex is a quality engineered smooth bore plain PTFE tube with AISI 304 high tensile stainless steel braid. Produced specifically for industrial use where reliability and long life are required or where hostile temperatures or corrosive considerations make PTFE the only logical choice. Abcoflex is available with translucent virgin PTFE or anti-static black where fluids with a high electrical resistance such as solvents and fuels are passed through the hose and allow the dissipation to any static charge.

Application: Abcoflex hose and assemblies can be used at temperatures ranging from -70° C to 260° C. Suitable for most known chemicals, acids, oils, corrosives, alkalis, gases, steam, pharmaceutical and foodstuffs industries.

Fittings: Male, female, flanged, Triclover and PTFE flared / encapsulated fittings available in all the material.

PLAIN/SMOOTH BORE PTFE HOSE WITH SINGLE SS BRAID					
Code	ID MM	OD MM	Working Pressure BAR	BURST Pressure BAR	Minimum Bend Radius MM
